Philip Wong

Toronto, ON Canada | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Analytics Engineer with 6+ years of experience building scalable data platforms using dbt and modern data stacks (Redshift, Snowflake, Databricks, Airflow). Strong focus on dimensional modeling, semantic layers, and data quality frameworks enabling self-serve analytics across Finance, Sales, and RevOps.

TECHNICAL SKILLS

- **Analytics Engineering:** dbt Cloud, SQL, Dimensional Modeling, Semantic Layer, ELT, Data Testing
- **Modern Data Stack:** Snowflake, Amazon Redshift, Databricks, Airflow, Celigo (iPaaS)
- **Scripting Languages:** SQL, Python, Git
- **Business Intelligence:** Looker, Sisense, Tableau

PROFESSIONAL EXPERIENCE

CARBON6 TECHNOLOGIES Toronto, ON
Analytics Engineer, Operations Sep 2023 – Present

- Joined as the first Analytics Engineering hire, building the company's data platform from the ground up and helping scale the analytics organization to a 10-person team spanning data ingestion, transformation, orchestration, BI, and reverse ETL
- Led the company-wide migration from legacy SQL transformations to dbt Cloud, refactoring over 250 models into a modular analytics framework with reusable macros, testing, documentation, and semantic modeling
- Designed and maintained enterprise-wide dimensional models serving Finance, Sales, Customer Success, and Revenue Operations as the organization's single source of truth for business reporting
- Engineered production ELT pipelines integrating Salesforce, NetSuite, and internal applications through Celigo, enabling a company-wide CRM migration from NetSuite to Salesforce within three months
- Established data quality standards through automated validation, operational SOPs, and SLA frameworks, proactively identifying and resolving pipeline and reporting issues across production datasets
- Launched the company's first centralized BI reporting layer in Sisense, establishing reporting standards that scaled to more than 50 dashboards used across the organization
- Helped scale the company's modern data platform during a period of rapid growth that culminated in Carbon6's $210M USD acquisition by SPS Commerce (NASDAQ: SPSC)

KIJIJI CANADA Toronto, ON
Senior Data Analyst, Revenue Operations May 2020 – Aug 2023

- Partnered with Data Engineering to onboard and model new data sources in Databricks, expanding reporting capabilities across Revenue Operations
- Built scalable virtual data marts and automated data quality monitoring workflows, improving reliability of Sales and Revenue reporting
- Developed self-service Tableau dashboards supporting territory planning, sales incentives, quota setting, and pipeline performance analysis
- Led analytics best practices across a team of 10 analysts by introducing GitHub version control workflows, improving collaboration and reducing analyst silos
