Toronto, ON Canada | [GitHub](#) | [LinkedIn](#)

BACKGROUND INFORMATION

- **Modern Data Stack:** dbt, Airflow, Celigo (iPaaS), Databricks, Snowflake, and Redshift
- **Scripting Languages:** SQL, Python, R, and Git
- **Data Visualizations:** Tableau, Looker, SiSense, Google Data Studio, ggplot2, and R Shiny

PROFESSIONAL EXPERIENCE

CARBON6

Toronto, ON

Analytics Engineer, Operations

Sep 2023 – Present

- First analytics IC hire, building the data function from the ground up and scaling it to a 10-person team spanning ingestion, modeling, orchestration, BI, and reverse ETL
- Scaled our modern analytics platform supporting company growth from early stage to a \$210M acquisition in 3 years
- Built SSOT data models powering Sales, Finance, Customer Success, and Operations, enabling high-impact insights including customer LTV, GMV, and segmentation
- Launched the company's first BI reporting layer in SiSense, establishing standards that scaled to 50+ dashboards used company-wide
- Led our BI tool migration project from SiSense to Looker, re-architecting data connections and models with zero disruption to daily operations
- Built and maintained GTM data integrations and reverse ETLs via Celigo (iPaaS), enabling a company-wide CRM migration from NetSuite to Salesforce in 3 months
- Established data quality and integrity frameworks, creating 50+ SOPs/SLAs to proactively detect and resolve pipeline and reporting issues
- Championed dbt as the framework in developing our semantic layer, migrated 250+ SQL-based tables to dbt

KIJIJI CANADA

Toronto, ON

Senior Data Analyst, Revenue Operations

Oct 2022 – Aug 2023

- Collaborated with data engineers by identifying and sourcing new data streams, integrating them into our data lake
- Built and designed data architecture of our virtual data marts, instilled trust and reliability through data quality initiatives (i.e. automated jobs with data breakage alerts in Slack)
- Partnered closely with sales leadership team to define GTM strategies and metrics (i.e. sales target setting, sales incentives, sales pipeline analysis, and territory management)

Data Analyst, Revenue Operations

May 2020 – Sep 2022

- Extract and loaded operational systems (CRM, Marketing) data into Databricks via scheduled Cron jobs in RServer
- Built self-serving business intelligence dashboards in Tableau to depict growth opportunities among our B2B sales teams, helping them identify high/low performing clients for consultative selling and account management
- Coached a team of 10 analysts to adopt version control best practices with GitHub in their daily workflows, enhancing team collaboration while reducing "analyst silos"

HONDA CANADA INC

Markham, ON

Graduate Experience Accelerated Rotation Program

Oct 2018 – Apr 2020

- 18-month leadership development program, building strong foundation in the company's core business operations through 6-month assignment rotations
- **Sales Operations:** Assisted in setting monthly targets for dealer operations, using weekly reporting to align vehicle allocation with sales objectives
- **Digital Marketing:** Led meetings with cross-functional groups and stakeholders to coordinate project deliverables, managing digital transformation initiatives (i.e. email campaigns, newsletters, website optimizations, digital ads, etc.)
